Marp Slides Example

An example of writing slides on Visual Studio Code using Marp

How to

Create some slides is really simple:

1. Install *Visual Studio Code* and the **Marp** extension using the *VS Marketplace* (Ctrl+Shift+X).
2. Create a *.md* file and add the following lines in the beginning:

```
---
marp: true
theme: uncover
---
```

3. Write your presentation using **Markdown** syntax.

4. Previsualize pressing *Ctrl+Shit+V*

5. Modify theme style using *HTML* and *CSS*:

```
<style>
    h1
    {
        color: darkOrange;
    }
    h2
    {
        color: orange;
        font-size: 30px;
    }
</style>
```

6. Export to **PDF** pressing *F1* and selecting *Export slide deck*

Full Mardown compatible

Write tables and whatever using markdown syntax

Name	ID	Frame	Checked
Head	0	Base	True
Neck	1	Base	False
Spine	5	Base	False
Base	8	World	True

Images using also markdown syntax:
